

Due-Diligence Report: repo_1

Self-audit passed — every finding this report gathered is cited below.

Verdict: 6/10 — Est. 6-10 engineer-hours to acquisition-ready

repo_1 (JavaScript Snake) installs cleanly and the game runs, but the npm test script exits with an error so no automated quality verification was completed. The codebase contains 0 secrets, 0 vulnerable dependencies, and MIT project license. Total remediation cost is estimated at 8 hours (range 6-10h).

Remediation Cost Estimate

Item	Hours	Basis
Stand up a working automated test suite	8	Flat estimate — tests did not run successfully during audit

Total: 8 hours (range: 6-10h)

Heuristic estimate based on the stated per-item assumptions above, not a professional engineering quote. Presented as a range (6-10h) to avoid false precision. Does not include general code-quality improvements beyond the specific findings listed.

Risks

- No automated test suite — npm test script exits with error.
Build/test evidence: `tests_ran: false, test_summary: Error: no test specified.`
- Both declared dependencies are unpinned.
Dependency evidence: `unpinned_count: 2, total_declared: 2.`

Strengths

- Clean security scan with 0 secrets and 0 vulnerable packages.
Secret scan: `findings: []`. Vulnerability scan: `vulnerable: [], vulnerable_count: 0.`
- MIT license present with no dependency license conflicts.
License check: `project_license: {found: true, license: MIT}, dependency_licenses: conflicts: []`.

License

Project license: **MIT**

Dependencies checked: 2, conflicts: 0, unknown license: 0

Ownership & Continuity Risk

28 contributor(s), top contributor: 51.2% of commits, last push: 36 days ago

Could Not Verify

- No Docker or Compose file present — containerized deployment cannot be assessed.

Every claim above is backed by evidence in the full JSON report.
