

Due-Diligence Report: repo_3

Self-audit passed — every finding this report gathered is cited below.

Verdict: 4/10 — Est. 34-62 engineer-hours to acquisition-ready

repo_3 is an academic C++ process scheduling simulator with no build system, no dependency manifest, and no automated tests. Bus-factor risk is present with top contributor share at 100.0% and 243 days since last push. Total remediation cost is estimated at 48 hours (range 34-62h).

Remediation Cost Estimate

Item	Hours	Basis
Stand up a working automated test suite	8	Flat estimate — tests did not run successfully during audit
Knowledge-transfer risk: safely onboard a new team onto this codebase	40	Flat estimate — 100.0% of commits from one contributor, no push in 243 days (bus-factor risk, not a code defect)

Total: 48 hours (range: 34-62h)

Heuristic estimate based on the stated per-item assumptions above, not a professional engineering quote. Presented as a range (34-62h) to avoid false precision. Does not include general code-quality improvements beyond the specific findings listed.

Risks

- Bus-factor risk: top contributor holds 100.0% of commits and last push was 243 days ago.
Ownership risk: top_contributor_share_pct: 100.0, days_since_last_push: 243, bus_factor_flag: true.
- No automated build or test support available.
Build/test evidence: attempted: false, reason: No deep build/test support for detected language(s).

Strengths

- No secret findings detected in scanned files.
Secret scan: findings: [], files_scanned: 6.
- README documents educational scope clearly.
README states academic and learning project purpose.

License

Project license: **not found**

Ownership & Continuity Risk

1 contributor(s), top contributor: 100.0% of commits, last push: 243 days ago

Bus-factor risk: commit history is highly concentrated in one contributor and the repo has gone quiet.

Could Not Verify

- Build/test correctness because language is not supported by pipeline.
- Dependency vulnerabilities because no manifest was found.

Every claim above is backed by evidence in the full JSON report.
